

EFFECTIVE DATE: 01|01|2022

POLICY LAST UPDATED: 10|18|2023

OVERVIEW

A doula is a paraprofessional who provides advice, information, emotional support, guidance, and physical comfort, etc. to pregnant persons, birth parent(s), partner(s), family, etc. before, during, and after pregnancy.

This policy applies to BCBSRI Commercial Products only. This policy does not apply to FEP Members or Medicare Advantage Plans, as doula services are not covered for Medicare Advantage members or for members of Blue Cross and/or Blue Shield Plans nationally e.g., BlueCard members.

For services provided by a non-participating provider, members should submit this [form](#) for reimbursement.

PRIOR AUTHORIZATION

Not applicable

POLICY STATEMENT

Commercial Products

Doulas must submit a formal credentialing application prior to rendering services to any BCBSRI member to be considered in-network. The doula must be certified by the Rhode Island Certification Board (RICB) prior to credentialing.

Doula services are covered as follows per each pregnancy.

Note: Doula services can be self-initiated by a member through self-screening e.g., a positive pregnancy test at home or through a healthcare provider referral:

- *Prenatal and Postnatal visits (up to the first 12 months postpartum)
- Labor and delivery – 1 encounter/unit of billing
 - 1 encounter/unit of billing for labor and delivery services is covered regardless of the duration/hours of the birthing process or for support whenever and however the pregnancy ends.
 - If more than one doula provides services for Labor and Delivery, the doula who provided the services at the initiation at Labor and Delivery shall be the billing provider for Labor and Delivery services e.g., 1 unit of billing. The second doula that provides services shall not file a claim, nor be reimbursed for their services by BCBSRI. It is expected that the initial doula that attends the Labor and Delivery and who submits a claim will coordinate with the second doula in terms of their reimbursement for their portion of the delivery for which they provided services.

COVERAGE

Doula services are available through BCBSRI for Commercial members only. ***There is no member cost share for doula services.*** This includes, but is not limited to; all deductibles (both HSA compatible and non-HSA compatible deductible plans) as well as any coinsurance and/or copayments that a member may have under their plan.

For BCBSRI self-funded employer groups, doula services are offered upon group renewal. Please note that self-funded employer groups/benefit plans hold the ability to elect to include or exclude doula services. Please remember to check benefits for each member seeking to obtain doula services.

Please note this Policy is only applicable to BCBSRI Commercial members, members who receive their healthcare coverage through BCBSRI. It does not apply to members of Blue Cross and/or Blue Shield Plans nationally/BlueCard members. Doulas looking to provide services to non-BCBSRI members should call the number on the back of the member's ID card to identify if the member has doula benefits.

BACKGROUND

A doula is a person who provides emotional and physical and other support during pregnancy, childbirth and after delivery/or at the end of pregnancy, and during the postpartum period. A certified doula has participated in applicable training program(s) in how to assist pregnant persons, birth parent(s), partner(s), family, etc., prior to, during and after pregnancy.

Doulas can perform different roles, depending on and directed by the needs of the pregnant person, birth parent(s), partner(s), family, etc. Elements of doula services may include:

The doula accompanies their client, provides emotional and physical support, suggests comfort measures, and provides support and suggestions for the partner. Whenever possible, the doula provides pre- and postpartum emotional support, including explanation and discussion of practices and procedures, and assistance in acquiring the knowledge necessary for the client to make informed decisions about their own care. The postpartum doula cares for their client and their family in their home in the first few weeks to months following the birth. The doula provides non-medical support and companionship, assists with newborn care and sibling adjustment, meal preparation and household organization. The doula offers evidence-based information on newborn feeding, emotional and physical recovery from childbirth and other issues related to the postpartum period, and can make referrals if necessary.

While labor and delivery of a live birth is the hopeful outcome, not all pregnant persons deliver a live birth. The postpartum period up to 12 months is the most critical time whether a live birth occurs or not. Doula services pose an effective interdisciplinary solution for families during this timeframe. If a member's pregnancy does not result in a live birth, the remaining allowance for perinatal doula services can be used toward postpartum and/or bereavement supports.

CODING

Commercial Products

The following CPT code and modifiers should be used by participating perinatal doula providers:

S9445 Patient education, not otherwise classified, non-physician provider, individual, per session

*A doula visit is considered a visit of at least 60 minutes. Providers shall bill one (1) unit of service for each visit in which doula services are provided. Providers should not report or submit claims for services that are less than 60 minutes. Members are allowed up to 6 visits for prenatal and postnatal services and one labor and delivery.

Please review your standard fee schedule for allowances for each service.

Modifiers

Use Modifier FP for prenatal services:

FP Service provided as part of family planning program

Use Modifier XU for attendance at the delivery:

XU Unusual nonoverlapping service, the use of a service that is distinct because it does not overlap usual components of the main service

Use Modifier TH for postnatal services:

TH Obstetrical treatment/services, prenatal or postpartum

Note: BCBSRI requires all claims to be submitted with the Modifiers above e.g., FP, XU, TH in the first or primary modifier field on all claims.

Use Modifier 95 for audio-visual telemedicine services in the secondary modifier field on all claims.

95 Synchronous telemedicine service rendered via a real-time interactive audio and video telecommunications system

If the above coding is not followed, BCBSRI will not be able to identify the services as Doula services and the claim will not reimburse under the correct benefit:

Place of Service

BCBSRI allows for prenatal and postnatal visits via telemedicine e.g., conducted via **telephone only** as well as **audio-visual telemedicine** visits.

All telemedicine services, regardless if performed via telephone only or audio-visual, must be billed with the following Place of Service:

Place of Service (POS) 02: The location where health services and health related services are provided or received, through telecommunication technology. Patient is not located in their home when receiving health services or health related services through telecommunication technology.

Place of Service (POS) 10: The location where health services and health related services are provided or received through telecommunication technology. Patient is located in their home (which is a location other than a hospital or other facility where the patient receives care in a private residence) when receiving health services or health related services through telecommunication technology

All other services should use an appropriate place of service code e.g., 12-Home, 11-Office, 22-Outpatient Hospital, etc.

This medical policy is made available to you for informational purposes only. It is not a guarantee of payment or a substitute for your medical judgment in the treatment of your patients. Benefits and eligibility are determined by the member's subscriber agreement or member certificate and/or the employer agreement, and those documents will supersede the provisions of this medical policy. For information on member-specific benefits, call the provider call center. If you provide services to a member which are determined to not be medically necessary (or in some cases medically necessary services which are non-covered benefits), you may not charge the member for the services unless you have informed the member and they have agreed in writing in advance to continue with the treatment at their own expense. Please refer to your participation agreement(s) for the applicable provisions. This policy is current at the time of publication; however, medical practices, technology, and knowledge are constantly changing. BCBSRI reserves the right to review and revise this policy for any reason and at any time, with or without notice.
